Title
Dangerous pothole near the main college gate

Description
A deep pothole at the BMSCE main gate forces cyclists toward moving traffic. Rainwater makes the depth difficult to judge. I observed loose asphalt at the edge during the morning college rush.

Category
Roads & footpaths

Observed date / time
12 Oct 2026 · 08:40 IST

How serious does it appear?

Low | Medium | High | Critical

Your assessment of severity, not an official classification. For immediate danger, contact local emergency services.

☑ Still happening at the time I observed it

No personal accusations or private contact details. Keep your description factual and specific.
